SKILLS

Network & Systems:

- Cisco (Routing, VLANs)
- Windows Server, Linux Admin, AD, Virtualization

Security:

- Penetration Testing
- SIEM Monitoring
- ModSecurity, Firewalls

DevOps & Tools:

- Docker, LEMP Stack, Filebeat, Elasticsearch, Kibana

Programming/Scripting:

- Java, JavaScript, Bash

SOFT-SKILLS

- Adaptability
- Attention to details
- Problem solving
- Critical thinking

LANGUAGES

- English - Fluent
- Hungarian - Native
- Dutch - Beginner

PROFILE

Results driven cybersecurity professional with a strong focus on delivering complete, high-quality outcomes. I bring versatility across key domains, including network security, infrastructure design, and penetration testing, built on solid hands-on experience. Whether securing, building, or scaling network environments, I approach each challenge with precision and accountability.

Skilled in identifying vulnerabilities through offensive testing and committed to implementing effective defenses, monitoring, and proactive security measures. Flexible, persistent, and driven by a problem-solving mindset, I add value wherever robust, secure, and resilient systems are required.

EDUCATION

Fontys University of Applied Sciences - 2025 - 2026
Cyber Security Professional Eindhoven, Netherlands

Bachelor of Applied Computer Sciences - Cyber Security Professional 2023 - 2026
Howest Hogeschool West-Vlaanderen Brugge, Belgium

Computer Network and System Technician - 2021 - 2023
Soproni SzC Handler Nándor Technikum Sopron, Hungary

ACADEMIC PROJECTS

Security HoneyPot Project OCTOBER 2024 - DECEMBER 2024

- Developed a honeypot web system to detect and log attacker behaviour.
- Built on LEMP stack with Elasticsearch, Filebeat, Kibana for analytics.
- Implemented ModSecurity to detect and block malicious HTTP traffic.
- Automated log collection and anomaly detection.
- Computer System & Application Operation Technician
- Deployed small to mid-sized networks with Cisco devices.
- Managed servers, virtual machines, cloud services, and databases.

Network Infrastructure Project - NETGATE DECEMBER 2022 - FEBRUARY 2023

- Built a secure multi-site network using Cisco routers and switches
- Configured VLAN segmentation for wired and wireless environments.
- Deployed and managed Active Directory across three locations.
- Applied network access controls and security policies.

CERTIFICATES

Computer System and Application Operation Technician

- Designing, installing, and operating small to medium-sized networks using Cisco devices,
- Ensuring the functionality and security of IT infrastructure, including servers, workstations, and cloud services
- Managing databases, virtualized environments, and web systems, providing technical support and implementing IT security measures.
